SUMMARY

SDET and QA Automation Engineer with 4+ years of software QA experience, 2+ years focused on test automation, and 7+ years across technology and software development. Experienced in building maintainable E2E and API automation with Cypress and Playwright, integrating tests into CI/CD, and working across Agile/Scrum teams. Recently expanded into production workflow automation and AI agents with n8n, connecting e-commerce order systems, messaging channels, CRM workflows, and AI-assisted customer support.

TECHNICAL SKILLS

- **Workflow & AI Automtion:** n8n, AI Agents, CRM Automation, WhatsApp/Telegram/Slack Integrations
- **Test Automation:** Cypress, Playwright, Page Object Model (POM), End-to-End (E2E) Testing, Data-Driven Testing
- **Testing Methodologies:** Manual Testing, Functional, Regression, Smoke, UAT, Exploratory, Cross-Browser, RTM
- **API Testing & Web Tools:** Postman, REST APIs, Chrome DevTools
- **Web Development:** JavaScript, TypeScript, SQL, React, Node.js, Express.js, MERN Stack, MongoDB
- **CI/CD & Version Control:** Git, GitHub, GitHub Actions, CI/CD Pipelines
- **Management & Methodologies:** Jira, ClickUp, SDLC, STLC, Agile, Scrum, Sprint Planning

EXPERIENCE

QA Automation Engineer (Contract) | Cypress & Playwright

Independent / Self-Employed

07/2024 - Present | Remote

- **Manual Testing:** Designed and executed test plans (functional, regression, smoke, UAT), wrote test cases for UI/UX and cross-browser validation, and performed exploratory testing to identify edge cases
- **API Testing & Defect Management:** Executed REST API tests manually via Postman and managed the full defect lifecycle using Jira (detection to retesting)
- **Collaboration & Automation:** Worked with cross-functional teams early in SDLC to align testing with business goals. Also built workflow automations (n8n) for order routing, CRM, and AI-assisted support to reduce manual tasks

QA Engineer (Contract) | Web & Mobile

Q8Tech Solutions Group

07/2022 - 06/2023 | Riyadh, Saudi Arabia (Remote)

- Designed and executed comprehensive test plans, functional, UI, smoke, and UAT cases across web and mobile platforms
- Collaborated with cross-functional teams early in the SDLC, driving product stability and achieving a 95% user satisfaction rate

Quality Assurance Engineer (Full-time)

The Lab Holding - 3fils

02/2020 - 10/2023 | Dubai, UAE (Remote)

- Led QA and end-to-end testing activities for core platforms including Lmmaa and Meelz, reducing production defects by 20% and ensuring 99.9% requirements compliance
- Designed and executed comprehensive test plans, functional, regression, and UAT test cases for web and mobile applications prior to major production releases
- Optimized the defect lifecycle and bug-tracking workflows using Jira and ClickUp, accelerating issue resolution time by 15% through close developer collaboration
- Partnered with cross-functional teams to establish testing best practices, driving continuous software quality and system reliability across the testing lifecycle

Full Stack Developer (Part-time)

Zaino

08/2018 - 02/2020 | Nazareth, Palestine (Remote)

- Engineered scalable web applications and RESTful backend APIs, integrating Google Ads API and real-time messaging features to enhance user interaction
- Designed database schemas and optimized server-side business logic using Agile methodologies, delivering high-performance UI and backend services

Web Developer (Contract)

Coktilat

08/2019 - 12/2019 | Gaza Strip, Palestine (On-site)

- Developed key responsive web features and RESTful backend integrations for Baity.sa, a Saudi real estate platform, enhancing overall system reliability
- Implemented secure user authentication, role-based access control (RBAC), and third-party API integrations to protect user data and ensure seamless system operations

Full Stack Developer

Makaani

05/2018 - 01/2019 | Dubai, UAE (Remote)

- Served as the sole MERN Stack Developer for Makaani property platform, owning the complete product development lifecycle from requirement analysis to cloud deployment
- Architected scalable front-end interfaces, designed efficient database models, and built robust RESTful APIs to ensure high-performance client-server data exchange

Full Stack Developer

Activat

04/2018 - 06/2018 | Gaza Strip, Palestine (On-site)

- Engineered high-performance, reusable React front-end components and REST APIs, successfully boosting user engagement by 15%
- Optimized database queries and server-side data models to streamline data flow and improve overall web application load times

Technical Mentor

Gaza Sky Geeks

11/2017 - 12/2017 | Gaza Strip, Palestine (On-site)

- Conducted hands-on technical training and code reviews in HTML, CSS, and JavaScript, improving students' coding proficiency by 20%
- Guided aspiring developers in problem-solving and web development best practices through structured mentoring sessions

EDUCATION

Bachelor's Degree in Computer Engineering, Islamic University of Gaza, Palestine | 2018

Full Stack Web Developer, Code Academy (Founders and Coders, UK) | 2017

TRAINING & COURSES

- ISTQB® Foundation Preparation: Testing in SDLC, Static Testing, Test Techniques & Management (Pluralsight)
- Generative AI & Prompt Engineering: Architecture, AI Chatbots, & Applied Prompting Techniques
- Test Automation & Quality Assurance: Cypress E2E JavaScript Testing & Web Debugging with Chrome DevTools
- Agile Project Management: Agile Methodologies & Sprint Delivery with Atlassian Jira
- Advanced Web Development: Advanced React Framework & Responsive Web Design Architecture
